Matthew Lakin, Acting Director
Air and Radiation Division, Region 9
U.S. Environmental Protection Agency
75 Hawthorne Street, AIR-7
San Francisco, California 94105
Lakin.Matthew@epa.gov

Dear Mr. Lakin:

The California Air Resources Board (CARB) is submitting final documentation for 2020 exceptional events that occurred in the ozone nonattainment areas of Ventura County and the Eastern Portion of San Luis Obispo County. CARB requests that the U.S. Environmental Protection Agency (U.S. EPA) concur that the document accompanying this request supports the flagging of ozone exceedances in the District as natural or exceptional events due to wildfire smoke impacts from numerous fires in the State of California.

Unusually high ozone concentrations, exceeding the 2008 8-hour national ambient air quality standard of 75 ppb in the Ventura County, and the 2015 8-hour national ambient air quality standard of 70 ppb in the Eastern Portion of San Luis Obispo County, were recorded in the summer and early fall of 2020. The analyses and data presented in the accompanying 2020 document, along with analyses and data previously submitted in the 2018 document, demonstrate that without the impacts from the wildfire smoke, the 2020 8-hour ozone Design Value for these areas would have been below the respective standards.

The 30-day public comment period required by 40 CFR 50.14(c)(3)(v) will begin on December 10, 2021 and will be completed by January 10, 2022. CARB is requesting parallel processing under U.S. EPA's procedure cited in 40 CFR 51, appendix V, section 2.3. Parallel processing is needed to expedite U.S. EPA action regarding the attainment status of Ventura County and the Eastern Portion of San Luis Obispo County. Any comments received during the public comment period, as well as responses by CARB, will be submitted to U.S. EPA at the earliest possible date.

On October 3, 2016, U.S. EPA revised the *Treatment of Data Influenced by Exceptional Events* rule that allows data to be flagged and excluded from consideration by U.S. EPA when making decisions related to the attainment status of an area (81 FR 68216). This rule requires that states submit documentation to support the initial flagging to the appropriate U.S. EPA Regional Office.
